Navigating together with KnowWake

Home to one of the world's largest networks of boaters navigating together, KnowWake's mission is to improve the entire boating experience by making it safer and more enjoyable for all. Driven by proactive, crowdsourced reporting from on-water app users, as well as historical data sourced from the U.S. Coast Guard and local law enforcement and government agencies, the app consistently recommends the safest routes, the best places to go boating, and the proximity to critical marine services like fuel docks, marinas, and boat ramps.
